WORK EXPERIENCE

Flutter Developer

23RD LTD (Software Development Agency)

07/2022 - 02/2024

London, UK (Remote work)

Developing diverse mobile apps: dating, shopping, delivery, and more.

Achievements/Tasks

- Implementing REST communications in the apps to get data from server-side. manipulate the data to show on various ways like into the beautiful chars or illustrated custom paints.
- Utilized Firebase Realtime Database and Storage to store and manage app data effectively. Additionally in some cases We used Socket.IO to provide chatting systems and real time updates.
- I promoted to Team Lead after 1 year, in order to manage team member's tasks and solve the challenges based on my expertise and experiences. especially in code bases I used to provide best solution to choose a perfect design patterns like MVVM and Clean.

Contact : Farhad Deilami (CEO) - farhad@23rd.co

Flutter Developer

RamdelStudio (Startup Accelerator)

08/2018 - 04/2021

Busan, SouthKorea (Remote work)

RamdelStudio is an Startup Accelerator, it provides zero to 100 services to their clients such as software development to publish their platforms.

Achievements/Tasks

- Implementing REST communications and utilizing Firebase tools like real time database-storage and crashlytics to the apps. to have a great and fast response to the end-users.
- I promoted to team lead after 1 year because of my hard-working and my deep knowledge about the project concepts and my professional skills in Flutter framework. so leading a team of 5 developers, from various locations was one of my achievement at this company.
- Working on complex UI/UX apps which was designed with the company's designers, I used to utilize newest and most compatible state-management techniques and libraries to get the best performance based on the project's requirement.
